

Lean Systems (4 hrs)

Benefits

Lean systems are the result of understanding lean principles and applying them systematically to your operations. In this short course, all forms of waste will be identified along with their relationship to quality costs. Value Stream Mapping will be explained with example.

Outline

- What is a Lean System?
- Objectives of a Lean System
- Forms of Waste
- Relationships between waste and quality costs
- Value Stream Mapping
- Implementation Issues

Who should attend

Managers and Quality Professionals at all levels who are interested in understanding and achieving Lean Systems.
